Progressive Civil Construction Company Pvt. Ltd.

| Clause 4.3.1 | Please refer to clause 4.3.1 of the eligibility criteria reproduced below.

- Similar work shall mean the building consisting of RCC Framed Structure having minimum five (5) storey above plinth including Finishing works, internal Water Supply & Sanitary installations, Internal Electrical Installation and Firefighting (Wet Riser / Down comr) system, all executed under one agreement / contract.

- We have constructed one similar work as per above definition of similar work.

- PFA the section drawing of that project & work completion certificate.

- The NSAC Bldg height upto 5th floor from Ground floor is 85.65m - 87.95m = 17.70m. PFA the section drawing of NSAC Bldg.

- However our similar project has four floors but the height from the ground floor is 22.6m.

- So our project has four floors but the height is more than the 5th floor of the NSAC building.

- Rest we are meeting the definition.

- Also we have done the HVAC VRF system in our project but tonnage is lesser than required by you. But that doesn't mean we can't install higher capacity HVAC systems.

- Hence we request you to relax your norms so that we can qualify. | No Change in Eligibility Criteria |
