

INDIAN INSTITUTE OF TECHNOLOGY BOMBAY
MATERIALS MANAGEMENT DIVISION
Powai, Mumbai - 400076

Dated: 26.05.2026

Ref. PR No. 1000055837

RFx. No. 6100003028

Corrigendum-I

**Design, Development, Deployment and Maintenance of ERPNext/Frappe-based
Student ID Card Access Monitoring & Analytics Platform at IIT Bombay**

Pre-Bid Queries

Sr. No.	Online RFP Clause	Vendor Query	IIT Bombay Response
1	5.1.1 Integration with RFID-based Access Control System	The vendors raised a query seeking more detailed specifications regarding the RFID-based access control integration, including the number of devices/controllers/gates to be integrated and the expected integration architecture/interfaces.	The document already specifies the number of transactions as 10 lakhs per day. Details of RFID device integrations will be provided upon finalizing the vendors. All the data from the physical devices would be made available to you for access via REST APIs.
2	5.1.3 Classroom Attendance Management	The vendors also raised a query regarding Section 5.1.3, requesting that the attendance management rules, timetable mapping, student data mapping, and administrative access requirements be defined more clearly.	The relevant details will be provided to the chosen vendor upon commencement of the project. This information would be available through REST API access.
3	Scalability and Performance	The vendors raised a query regarding the Scalability and Performance requirements, specifically requesting the expected number of concurrent users and transactions that the platform is required to support.	We do not expect real-time representations of the data by the software but rather near real-time. Thus, a five-minute delay in representing the data is acceptable. The peak number of physical transactions can be expected to be in the region of 5000-6000 per minute.

4	Authentication and Access Control Latency	The vendors raised a query regarding the clause pertaining to minimal latency in authentication and access control, requesting that the acceptable latency/response time limits for authentication and access validation be clearly specified.	As noted in response to Query 3, the software should produce near real-time response. A five-minute delay in representing the data is acceptable. As a corrigendum, all references to "real-time" in the document should be read as "near real-time"
5	Performance Bank Guarantee (PBG)	Vendors had sought clarification regarding the applicable PBG percentage.	Performance Bank Guarantee (PBG) shall be 5% of the contract value. Revised PBG format enclosed

Assistant Registrar
